

GUARDIAN SPECIFICATION SHEET – GWB300

MAINTENANCE SYSTEM FOR GUARDIAN WATERBASED ANTI GRAFFITI COATING (WATERBASED NON SACRIFICIAL COATING)

MAINTENANCE SYSTEM - WATERBASED

After initial application of Guardian Waterbased Anti Graffiti Coating it is recommended to allow the coating the fully cure for a minimum of 7 days before cleaning of the surface.

To maintain Guardian Waterbased Anti Graffiti Coating in the best performance it is recommended to remove graffiti and other marks from the coating as soon as possible.

For general cleaning off of dirt and grime it is recommended to clean the coating surface with mild detergent and pressure washing with water at least every 12 months.
