

Guardian Graffiti Remover

Graffiti Remover for smooth surfaces or surfaces protected with Guardian Permanent Coating

Uses

- On surfaces protected by
 - **Guardian Anti Graffiti Coating**
 - **Guardian Graffiti Shield**
- Plastics (hard)
- Metal
- Ceramic and porcelain
- Polished natural stone and non-porous masonry
- Formica
- Road signs and enamel (special conditions of application: 10 to 30 seconds)

Advantages

- Environmentally friendly
- Non caustic
- Biodegradable
- Easy to use
- Efficient under temperatures from 5°C to 50°C
- Pleasant smell
- Removes graffiti quickly without affecting the surface
- Simple and fast cleaning on protected surfaces
- Multiple cleaning on surfaces protected with **Guardian Anti Graffiti Coating**
- Rinse with water

Coverage

(indicative quantity, depending on the porosity, the nature, the regularity of the surface and age of graffiti)

Between 10 and 12 m² per litre

Application

- **Consult the SDS to ensure required PPE is used during application**
- Make sure that the surface is dry before applying the Remover.
- Apply the product with a brush or a spray and use a natural bristle brush. Leave the product for 3 to 5 minutes. On painted non-protected surfaces, leave on for 15 to 30 seconds.
- Rinse graffiti from non-porous surfaces with water and cloth.

Very old, hardened graffiti can require more than one treatment. Dry the surface with a cloth between each application.

- After removing always neutralise with water.

Preparation

- Dry up the surface before cleaning.
- Always start on a small test area in case of non-protected surfaces.
