

Guardian Graffiti and Shadow Remover

*Solvent remover to clean graffiti shadows
from unprotected masonry*

Uses

- Non painted, porous substrates
- Natural stone
- Brick

Advantages

- Fast action
- Very effective on residual stains
- Removal of permanent marker graffiti

Coverage

(indicative quantity, depending on the porosity, the nature,
the regularity of the surface and age of graffiti)

Between 3 m² and 5 m² per litre

Application

- **Read Guardian SDS prior to use. Wear required PPE**
- Make sure the surface is dry before application
- Apply the product to the graffiti with a brush of natural bristle
- During application, brush the product in to maximise the efficiency of the product
- Wash off the shadow with high-pressure water
- More than one application may be necessary. Reapply as required.

Preparation

Make sure the surface is dry before application. Test a small section of the area to ensure removal of graffiti is as required.

Do not use on aluminum, copper, zinc
